

Lab-4B Assignment

Due Wednesday July 22

Lab-4B Review test is *optional*.

1. Follow the tutorials shown in SolidProfessor Lab-4B to create a solid model of the “Light Bulb.” The instructions are also available as a PDF and are posted on CCLE as “*CaseStudy-AdvancedPart-LightBulb*,”
 - Inscribe your name **on the base** of the bulb and upload the part file as “*LastName_LightBulb.sldprt*” to CCLE (*due Wed Jul 22*)
2. Download the image called “*spoon*” from CCLE and follow the walkthrough tutorials on SolidProfessor to create a solid model of a pasta scoop. This exercise might require several redoes before successfully creating a feature. So do not be discouraged even if you have to start all over from the beginning. Save your work frequently as you develop the model.
 - Inscribe your name **on the handle** of the pasta scoop and upload the part file as “*LastName_PastaScoop.sldprt*” to CCLE (*due Wed Jul 22*).
