

Practice Exercise – Swivel

Drawings, Introduction to SOLIDWORKS

Summary:

In this exercise, you'll create a Swivel part using the drawing views supplied in the instructions. Once the part is created, you'll create a drawing using a Base view and specific projected views. Then dimensions will be added to those views in the drawing.

Reference Lessons:

- [Drawings Overview - Starting a New Drawing](#)
- [Model Views](#)
- [Projected Views](#)
- [Dimensions](#)

Instructions:

1. Open a new part file in SOLIDWORKS using millimeter units.
2. Create the part file as shown in the image below:
